

Vishnu Vardhan Eturi

Senior Software Engineer

📍 Hyderabad | 📞 +91 9491881265 | @ eturivishnu@gmail.com

Summary

Results-driven **Senior Full Stack Engineer** with 5.8 years of experience designing and leading scalable, high-performance web applications. Specialized in **Vue 3, .NET Core, Node.js, and TypeScript**, with deep knowledge of modern front-end ecosystems, microservices, and cloud-native architectures. Proven track record of optimizing performance, mentoring developers, and delivering complex features in agile, production-grade environments.

Experience

RIG Enterprise Application

Software Engineer

September 2021 - Present

Hyderabad

<https://www.onblick.com/>

Vue 3, .NET Core, Node.js, TypeScript, MongoDB, Webpack, Chart.js, MySQL, Redis, Docker

- Architected and led the migration from **Vue 2 to Vue 3**, reducing bundle size by 28% and improving initial load time by 40%.
- Designed and built a **modular UI component library**, reused across 4 internal apps, cutting front-end dev time by 30%.
- Developed **real-time dashboards** using Chart.js and WebSocket APIs to deliver live analytics for HR teams.
- Mentored 3 junior developers on clean architecture, test-driven development, and efficient use of Vuex state management.

RIG Enterprise Application

Software Trainee

April 2020 - August 2021

Hyderbad

<https://www.onblick.com/>

Vue.js, .NET Core, JavaScript, TypeScript, HTML5, CSS3, Webpack, Jest, Vue Test Utils, REST APIs, MongoDB, Git, Agile/Scrum

- Developed **responsive, modular front-end interfaces** using Vue.js, TypeScript, HTML5, and CSS3, ensuring scalability, maintainability, and cross-browser compatibility in production deployments.
- Implemented **unit and snapshot testing** with Jest and Vue Test Utils, improving front-end code reliability, reducing regressions, and establishing early testing discipline within the team.
- Contributed to **.NET Core backend services**, designing RESTful APIs, integrating front-end data workflows, and gaining hands-on experience with **MongoDB** for efficient data modeling and CRUD operations.
- Assisted in **Webpack build optimizations** and version control using Git, while collaborating in Agile sprints and peer reviews—laying the foundation for strong full-stack and team-oriented development practices.

Projects

OnBlick OnBoarding

Developed a comprehensive onboarding feature to streamline the employee onboarding process within the organization. This feature aimed to enhance user experience and efficiency by providing a structured, automated onboarding workflow for new hires.

January 2023 - Present

Vue 3, Vuex, .NET Core, MongoDB, Node.js, Webpack, Redis

- Designed a **fully modular onboarding workflow** integrated with legacy HR systems; reduced onboarding cycle time by 45%.
- Engineered **real-time status tracking** and asynchronous job handling via Redis queues and SignalR WebSockets.
- Implemented role-based access and dynamic form rendering, boosting user flexibility and reducing support tickets.

Outcome: Improved HR team productivity by 30%.

OnBlick HR Legacy

Developed a SaaS-based HR Immigration and Compliance solution, focusing on creating a stable and reliable application for handling HR operations. The platform was designed to ensure smooth integration between frontend and backend services, providing a user-friendly experience for HR professionals.

September 2021 - December 2022

Vue 3, .NET Core, MongoDB, TypeScript, Webpack

- Architected and optimized the **front-end rendering pipeline** using Vue 3 and Webpack, enabling smooth real-time interactions
- Led API refactoring efforts to follow **SOLID principles** and domain-driven design.
- Introduced Jest and xUnit testing pipelines, achieving **85% code coverage** across services.

Outcome: Enhanced performance under heavy load, reduced API latency by 40%, and improved maintainability.

OnBlick I9 Assist

Developed a SaaS-based application aimed at providing a scalable and user-friendly solution for users needing to manage I-9 compliance.

May 2020 - August 2021

Vue 3, Vuex, TypeScript, .NET Core, MongoDB, Webpack

- Developed responsive UI with lazy loading, improving perceived performance on low-end devices by 50%.
- Integrated **real-time updates via SignalR**, enabling instant verification feedback to compliance teams.
- Optimized DB queries and introduced caching to handle large-scale document verification workloads efficiently.

Outcome: Achieved 98% reduction in manual intervention during I-9 verification, ensuring compliance accuracy.

Skills

Frontend: Vue 3, Vuex, React.js, JavaScript, TypeScript, Chart.js, Webpack, Vite, HTML5, CSS3

Backend: .NET Core, Node.js, PHP (Laravel)

Database: MongoDB, MySQL, Redis

DevOps: GitHub Actions, Azure

Testing: Jest, Vue Test Utils, xUnit

Architecture: Microservices, Event-Driven Systems, Clean Architecture

Other: Agile/Scrum, DSA, Performance Optimization, Mentorship

Education

Vaagdevi Engineering College

Computer Science

July 2015 - May 2019

Bachelor of Technology

Warangal
